Subject: RE: Controlled Substance Order Quantity Override Form

Hello Amish,

The Controlled Substance Order Monitoring system now in place sets limits for each item based on the chain average for that item for stores of similar size. If a particular store fills more of this item than normal and needs additional product we would need to document the reason and increase via a CSO Override (which it sounds like you have done). The purpose for this is to ensure we have performed adequate review before sending in additional inventory.

The previous system would continue to send additional product to the store without limit or review which made possible the runaway growth of dispensing of products like Oxycodone, that played a roll in the DEAs investigation of Walgreens.

So as it relates to this store... The store fills significantly more Zolpidem than stores of similar size which triggered the ceiling and review process.

Hey Ed,

Any insight as to why?

Thank you and be well,
Amish

Amish,

I know some other stores are having this issue too.....but can you help explain to me limiting zolpidem so heavily. I have had 2 corporate complaints within a week, 90 OOS, and several long time customers transfer out due to not having this drug in stock. I was approved for 25 bottles, but with the oos I currently have I am already going to use 14 bottles. Is there any other suggestions you may have or advise you can give....it just seems the store is being set up to fail and having to deal with so many issues that should never have come up.

Thanks,
Melody
